Admission requirements
The Master is open to candidates who have a Master of Science in Laurea Magistrale/Specialistica (equivalent to Master of Science) in Engineering, Economics or other scientific fields. For foreign candidates, equivalent academic qualifications in the related academic fields will be evaluated.

Application
The application form and the documentation can be found on the master course website

www.mastertunnelling.polimi.it
oppure
http://www.poliedra.polimi.it/formazione/

and must be sent to

formazione-poliedra@polimi.it

before the 1st of December 2020.

Selections
The selections will start in December 2020 and will be made by the master commission, on the basis of the qualifications and experiences inferred from the curriculum presented and on the basis of an interview in order to evaluate the skills and motivations of the candidates.

Teaching support
master-tunnelling-dica@polimi.it

Fees
The Master costs € 7,000.00, divided as follows:
Contribution for the enrolment – € 500.00
Master tuition fees – € 6,500.00
PRESENTATION

Contents
As is testified by the number of kilometers of tunnels constructed every year all around the world, tunnelling is a rapidly expanding sector on a global scale. In this context, suitably trained professionals, with multidisciplinary knowledges are in largely demanded. At the moment, these skills are not provided by the traditional academic courses and cannot be easily acquired during the professional experience. The master course in “Tunnel Engineering”, supported by many companies operating in the tunnelling sector, is conceived as a high specializing course, aimed at providing multidisciplinary skills, by defining a complete and articulated framework of all the necessary contents to prepare professionals with operational capabilities in design, construction and project management. Academics teachers and professional, operating both at a national and an international level, will tackle different engineering, technological, organizational, environmental, economical, legislative, strategic, managerial themes.

Career opportunities
The master will give the possibility of getting in touch with academic teachers, professionals and managers. The course aims not only at providing an internationally recognized academic title but also at creating a centre of excellence on tunnel engineering, where the different professionals are capable of interpreting and managing the complexity of the problems and becoming active and innovative actors in the research of new engineering solutions as well as capable of assuming position of responsibility in project management. The career opportunities can be identified in companies of design, construction, manufacturers of materials and technologies, machine producers, infrastructure managements.

The 2nd level “Master in Tunnel Engineering” has been activated at the Department of Civil and Environmental Engineering (www.dica.polimi.it).

The School of reference is the School of Civil Environmental and Land Management Engineering of Politecnico di Milano (www.ingcat.polimi.it).

The Master Director is Professor Claudio di Prisco.

The Master Commission consists of professors and professionals operating in the tunneling sector:
Prof. Claudio di Prisco – POLIMI
Prof. Marco di Prisco – POLIMI
Prof. Pietro Lunardi – ROCKSOIL
Prof. Federico Perotti – POLIMI
Prof. Jean Sulem – ECOLE DES PONTS, PARIS
Ing. Carlo Silvestri – LOMBARDI
Prof. Umberto Perego – POLIMI
Prof. Alberto Guadagnini – POLIMI
Prof. Maurizio Crispino – POLIMI
Ing. Massimo Lodico – Astaldi
Prof. Daniele Pella – POLITO
Dott. Davide Grassi – BASF
Prof. Mauro Mancini – POLIMI
Ing. Giovanni Canetta – CEAS

Organizing committee
Dr. Irene Redaelli
Dr. Luca Flessati
Prof. Claudio di Prisco

Duration 12 months
(1st Mar 2021-28th Feb 2022)
Language English
Format Full time
Commitment From Monday to Friday
Max participants 20
ECTS 60
Venue Politecnico di Milano, Campus Leonardo

Master Organization
The master is conceived as a transversal and multidisciplinary course in which theoretical lessons (online), specialist subjects, case studies, technical visits and internships are integrated. The master is a full time course lasting one year. During the first six months the students will attend theoretical lessons, seminars and will take part in technical visits in laboratories and construction sites. During the following six months the students will have the opportunity of participating in internships/projects in different companies, under the supervision of professors and professionals operating in the tunneling sectors. All participants will have access to the course material, in English, that will be uploaded on an online platform and will remain available until the final exam.

Theoretical online lessons 360h (Mar 2021-Jul 2021)
Individual study 1100h
Internship 480h (Sep 2021-Jan 2022)
Technical visits 40h
Project work 120h

Coordinators
Prof. Lausa Scesi – POLIMI
Prof. Sebastiano Foti – POLITO
Prof. Carlo De Michele – POLIMI
Prof. Claudio di Prisco – POLIMI
Prof. Federico Perotti – POLIMI
Prof. Emilio Bilotta – UNINA
Prof. Riccardo Castellanza – UNIMIB
Prof. Marco di Prisco – POLIMI
Prof. Pietro Gambarova – POLIMI
Prof. Fabio Inzoli – POLIMI
Prof. Daniele Pella – POLITO
Ing. Giovanna Cassani – ROCKSOIL
Prof. Riccardo Barzaghi – POLIMI
Prof. Maddalena Carsana – POLIMI
Ing. Alberto Selleri – AUTOOSTRADE PER L’ITALIA
Prof. Maurizio Crispino – POLIMI
Prof. Lorenzo Domenichini – UNIFI
Prof. Mauro Mancini – POLIMI
Prof. Marco Giorgino – POLIMI
